

Warfighter Information Advantage Symposium 2024

OCTOBER 29-30

Augusta, GA

Theme: *EW Reenergized - The Army Phoenix Taking Its Place in the Joint / Coalition Fight*

Objective: The inaugural Warfighter Information Advantage Symposium addresses the synergies of Signal, Cyber, and EW and their critical role in creating and exploiting information advantages as a key aspect of multidomain operations. With the Army experiencing a rebirth and transformation of EW after decades of absence, this novel forum will focus on the combat development aspects of fighting and maintaining an advantage in the electromagnetic environment. Emphasis on evolving DOTmLPF-P, new and emerging requirements, training, education, experimentation, game-changing operational capabilities, and force modernization will make this a unique venue for government, military, industry, and academia to exchange insights and collaborate on the way forward.

Symposium Classification: U.S. Secret Only

Call for Papers: Original presentations are being solicited from the United States Government, Academia, Industry, Operational Units, and Subject Matter Experts on how current and emerging technologies in electronic warfare, cyber, signals intelligence, information operations, and other forms of non-kinetic engagement will support deterrence of our adversaries win decisively in a joint, multi-domain, high-intensity conflict across all phases of competition.

Topics of Interest

- Information Advantage During Large Scale Combat Operations
- Unified Network and the Hybrid Cloud – Accessing Information Anytime, Anywhere
- Novel solutions for succeeding in a competitive, congested, and contested EME
- Electromagnetic Warfare – how to Fight and Win in the Electromagnetic Spectrum
- Unmanned Capabilities in Cyberspace and Electronic Warfare
- Transforming in Contact - Exercises, Experimentation, and Soldier Touchpoints
- From the Field – Electromagnetic Spectrum Operations and Lessons Learned
- Signature Management – Hiding in Plain Sight
- Adversary Capabilities and Challenges in EMS
- Cyber and EW in Joint /Coalition Operations

IMPORTANT DATES:

Abstracts Due: June 28

Notification of Acceptance: By July 19

Final Presentations Due: October 11

Security Clearance Due: October 22

Warfighter Information Advantage Symposium 2024

OCTOBER 29-30

Augusta, GA

(All fields are mandatory and must accompany your 400 words or less Unclassified abstract)

SPEAKER LISTING: We understand there are often several authors who participate in preparing a presentation, please only list the person who will present onsite if your paper is selected.

Briefer's Full Name: _____

Briefer's Organization: _____

Briefer's Sal/Title: _____

Briefer's Email: _____

Briefer's Phone Number: _____

Presentation Title: _____

If accepted, final presentation will be marked, submitted, and briefed at the following classification.
(Please check all that apply so you are placed into the agenda according to paper classification)

Unclassified US Secret

Submissions must be Unclassified and focus on the following topic areas: (Choose one or more):

- Information Advantage During Large Scale Combat Operations
- Unified Network and the Hybrid Cloud – Accessing Information Anytime, Anywhere
- Novel solutions for succeeding in a competitive, congested, and contested EME
- Electromagnetic Warfare – how to Fight and Win in the Electromagnetic Spectrum
- Unmanned Capabilities in Cyberspace and Electronic Warfare
- Transforming in Contact - Exercises, Experimentation, and Soldier Touchpoints
- From the Field – Electromagnetic Spectrum Operations and Lessons Learned
- Signature Management – Hiding in Plain Sight
- Adversary Capabilities and Challenges in EMS
- Cyber and EW in Joint /Coalition Operations

Please forward abstract and this abstract form to Ms. Christine Armstrong, armstrong@crow.org Must received both to be considered.
