

Kevin Finch

COL Kevin Finch, USA (Ret.), currently works in the ISR/EW sector at Booz Allen Hamilton. During his 28-year US Army career, Kevin served in leadership positions at Program Executive Office Intelligence, Electronic Warfare and Sensors (PEO IEW&S), the Defense Information Systems Agency (DISA), Headquarters Department of the Army (HQDA), and Army Cyber Command (ARCYBER), focusing on delivering Electronic Warfare, Space, SIGINT, and Cyber capabilities.

While serving as the Project Manager for Electronic Warfare and Cyber (PM EW&C), Kevin was selected as the 2019 Army PM of the Year and earned the 2021 AOC Stanley B. Hall Executive Management Award. He championed both Modular Open Systems Approaches (MOSA) and Sensor Open Systems Architecture (SOSA) aligned solutions. Kevin's team fielded Electronic Warfare Quick Reaction Capabilities for use in INDOPACOM and EUCOM and developed multiple EW Programs of Record (PORs) to address near-peer threats. While serving as the Product Manager for Information Warfare (Now Project Manager Cyber & Space) and as the PM for EW&C, Kevin lead the team who initiated, developed and fielded PORs that are now the Joint Common Access Platform (JCAP) and the Joint Development Environment (JDE), key components of Cyber Command's Joint Cyber Warfighting Architecture (JCWA.)

His years of experience provide great insight into the requirements, funding, and acquisition of cutting-edge capabilities needed to gain an advantage in the Electromagnetic Spectrum (EMS.) Kevin has been active in the AOC as a speaker, panelist, and the national convention committee. In his current position, Kevin continues to advocate for EMS capabilities.
